

Contingency Committee will consist of the Event Chair (or his designee) and two subcommittees, the Restart Committee, and the Adjustment Committee:

1) **Restart Sub-Committee:**

Jace Pendino (Gun Club Manager), Bill Swango, and Pat Anderson or another LIT Representative.

- a. In the event of a stoppage of the competition due to inclement conditions, this committee will determine when the course of fire may resume, if ever. **Committee members will not announce any restart.** Once they have determined a time that shooting may resume, they will notify the Adjustment Sub-Committee.
- b. In the event of lightning, competition will cease immediately, and all participants and trappers will be instructed to leave the course and find shelter, preferably at the pavilion, where they are to await further instruction from the Contingency Committee.
- c. In the event of high winds, heavy rains, or other inclement conditions impacting participants' safety or enjoyment, either Jace Pendino or Bill Swango will determine if a stoppage is necessary and will notify Krista Hunter, the course managers, and participants to cease the course of fire and instruct all participants and trappers to leave the courses to find shelter at the pavilion where they are to await further instruction from the Contingency Committee.

2) **Adjustment Sub-Committee:**

John Johnson, Chad Blanchard, and Krista Hunter

- a. This sub-committee shall be responsible for adjusting the course of fire with the goal of maintaining the flight schedule of 8:00 am to 10:30 am, and 11 am to 1:30 pm, while allowing the participants to shoot as many targets as possible. Adjustments shall be based on the following protocol:
 - i. If the first flight is delayed or stopped before 10:00 am and shooting may begin or resume by 10:30 am, the first flight will continue until the earlier of completion of the competition or 11:30 am. Under no circumstances will the first flight competition resume after 10:30 am or continue after 11:30 am. If the first flight course of fire is not completed by 11:30 am, all shooting will cease at 11:30 am, competitors will be instructed to leave the course and turn in their scorecards and the first flight will be deemed completed.
 - ii. The 2nd flight will commence 30 minutes after the first flight is completed or deemed completed as provided in subsection (i) above, subject to the Gun Club's completion of machine reloading, but in no event earlier than 11:00 am.
 - iii. If a stoppage of the first flight occurs after 10:00 am (whether it is the first or a subsequent stoppage), the first flight will be deemed completed.

- iv. If the 2nd flight is stopped (a) more than 2 hours after the time the 2nd flight starts or (b) after 2:00 pm, all shooting will cease, competitors will be instructed to leave the course and turn in their scorecards and the second flight will be deemed completed. The second flight will end no later than 3 pm. If the second flight course of fire is not completed by 3:00 pm, all shooting will cease, competitors will be instructed to leave the course and turn in their scorecards and the first flight will be deemed completed.
- v. In the event of a delay or stoppage which prevents more than 80% of the competitors on a flight from completing the course of fire, the raw score for (a) each team will be determined by (i) excluding the flurry score, if any, (ii) determining the percentage of targets hit by all competitors on the team (dividing the total number of targets hit the team by the total number of targets attempted by the team) and (iii) multiplying that percentage by the product of the number of shooters on the team X 80; and (b) a competitor will be the competitor's average score.
- vi. To determine awards, if two or more teams or competitors have the same average, the team or competitor breaking the most targets will be declared the winner. If the competitors or teams have broken the same number of targets, the winner will be the competitor or team who broke the most targets on the common tiebreaker station or stations (as determined by the gun club) that both competitors or teams completed. If the competitors remain tied after the tiebreaker stations, the winner will be the competitor who broke the most targets on the common stations that both competitors completed. If the competitors remain tied at that point, the winner will be determined by a coin toss.
- vii. Any ambiguities in this plan or any disputes arising from the interpretation or application of this plan shall be resolved by a majority vote of the adjustment committee.

3) Weather Cancelled Event:

- a. If inclement conditions prohibit the event from occurring, the event will not be rescheduled.
